Tasks Sheet

1. Write programs for the following class diagrams:

```

-color:String = "red"
+Circle()
+Circle(radius:double)
+Circle(radius:double,color:String)
+getRadius():double

                                           "Circle[radius=r,color=c]"
+toString():String •
                    \ superclass
          extends
                     subclass
